Art Unit: 1614

Claims 15-20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific tumors disclosed on page 5, lines 6-14, does not reasonably provide enablement for the term "tumor proliferation". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The term "tumor proliferation: in claims 15-20 lacks clear exemplary support in the specification as filed.

1. The cancer therapy art remains highly unpredictable, and no example exists for efficacy of a single product against tumors generally. Therefore, based on the predictable nature of the invention and state of the prior art, the lack of guidance and working examples, and the extreme breadth of the claims, one skilled in the art could not use the entire scope of the claimed invention without undue experimentation.

(See claim 1 last two lines of the parent patent).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1614

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
